ACCOUNTING POLICIES

Accounting convention
The financial statements have been prepared under the historical cost convention as modified by the revaluation of certain assets and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

The financial statements are expressed in US Dollars

Preparation of consolidated financial statements
The financial statements contain information about Panally LTD as an individual company and do not contain consolidated financial information as the parent of a group. The company has taken the option under Section 398 of the Companies Act 2006 not to prepare consolidated financial statements.

Investment property
Investment properties are revalued annually at their open market value in accordance with FRSSE (effective April 2008). The surplus or deficit on revaluation is transferred to a revaluation reserve except where the deficit reduces the property below its historical cost, in which case it is taken to the profit and loss account.

No depreciation is provided on investment properties which is a departure from the requirements of the Companies Act 2006. In the opinion of the directors these properties are held primarily for their investment potential and so their current value is of more significance than any measure of consumption and to depreciate them would not give a true and fair view. If this departure from the Act had not been made, the profit for the year would have been reduced by depreciation.

Deferred tax
The charge for taxation takes into account taxation deferred as a result of the timing difference between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date. However, deferred tax assets are only recognised to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the timing difference can be deducted. Deferred taxation is measured on a non-discounted basis at the tax rates and laws enacted or substantively enacted at the balance sheet date.

Foreign currencies
Assets and liabilities in foreign currencies are translated into US dollars at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are translated into US dollars at the rate of exchange ruling at the date of transaction. Exchange differences are taken into account in arriving at the operating result.

Investments
Investment in subsidiaries are stated at cost less any provision for impairment.

Other operating income
Other operating income represents rental income from investment properties which is accounted for on accruals basis.
